About Us

For more than 30 years, Invento is synonymous with imaginative fun and leisure activities, for a liveable world, for young and old, indoors and outdoors. As an antipole to an increasingly hectic everyday life, people today are looking for leisure activities that focus on fun, relaxation and deceleration. Invento is prepared for these expectations and shapes the leisure time of young and old in many ways and with an exceptional product range. Kites, windspinners, toys - the Invento range includes exceptional, innovative and high-quality products that have a touch of something special. With our products, we improve people's well-being to better meet the ever-increasing challenges of everyday life.

„HQ“ - Created For Fun, Engineered To Last:

With our „HQ“ umbrella brand, we hold a leading position worldwide in the markets for Kites and Windspinners. Due to high quality standards, good customer service, a versatile product range and the development of products by our own German team, Invento differs from its competitors and creates a lasting confidence in the performance of our products.

Toys - „Invento just play“ and brands from all over the world:

Our own toy ranges under the umbrella brand „Invento just play“ stand for extraordinary playing experiences and high quality standards. With a passion for products beyond the ordinary, we complement our own product lines with a variety of well-known brands from all around the world. Let us take you on a discovery trip through our exciting catalogues.

The Invento B2B Webshop: Fast, practical and super easy!

Place your future orders quite comfortably in our webshop on www.invento-hq.com, which is exclusively addressed to retailers - work faster, easier and more convenient.

Our B2B webshop offers you numerous advantages:

- **Optimum of convenience:** Boot PC – log into the webshop – place your order!
- Web shop orders will be given **top priority – acceleration** of order processing!
- **Place orders at any time suitable for you** – 24 hours a day, 7 days a week and 365 days a year!
- Inventory information in real-time
- **Most recent information** regarding special offers, novelties, best-selling items and discontinued products
- Multimedia product information (e.g. videos)
- Download of product images
- Search, select and order quickly
- Compose individual **digital reminders** (time savings in follow-up orders)
- Availability information in the shopping cart
- **Increased transparency:** Order history for current and completed orders, backorder information

Register now and enjoy special advantages!

To access our webshop, you simply need your email address and password!

2 simple steps to request your password:

- 1) Please provide us with your shop email address:
Tel: +49 (0) 4402 9262-0 or
Fax: +49 (0) 4402 9262-29 or
Email: service@invento-hq.com
- 2) **After your email address has been stored**, click on the “Forget password/request” button on the screen. Enter your email address and zip code and we will send you the login password by email.

However, you can also request your password in person. We gladly will inform you about your password on the phone or by email.

If you are not yet our customer, we will be pleased to register you as a new customer.

For security reasons, we recommend that you change your temporary password during your first order (password can only be changed when making a purchase).

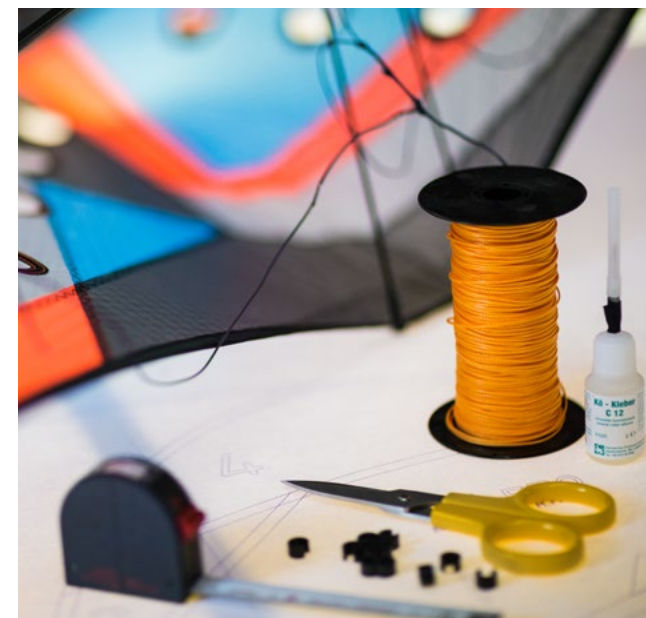

Spare parts and repair service for HQ kites

With a kite from HQ, consumers rely on the highest quality in kite sports. Nevertheless, under harsh operating conditions, damage can occur or parts can be lost through inattentiveness.

For this reason, Invento offers dealers and end users a comprehensive spare parts and repair service if something breaks or the question arises whether a repair is worthwhile.

Should you have any questions with respect to spare parts or repair service, do not hesitate to contact us. Many spare parts can be ordered directly from the online store. We handle the shipping of replacement parts or the repair of an HQ kite by qualified specialists as quickly as possible.

Children's kites, bigger single-line kites or stunt kites from HQ - always the perfect choice.

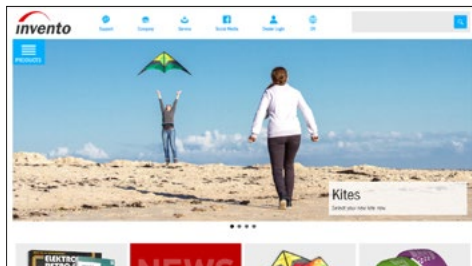

Invento Customer Services + Nature Protection

For us, service means more than just the timely delivery of goods at a reasonable price. We offer our customers a variety of helpful services:

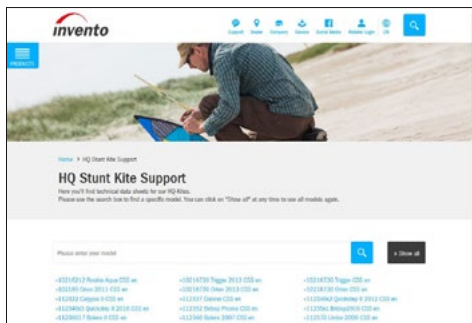

Invento B2B Webshop

See catalogue page 4 for detailed information about the Invento B2B Webshop.

HQ Sport Kite Support

In the support area of our B2B webshop on www.invento-hq.com you will find technical data sheets for many HQ Sport Kites.

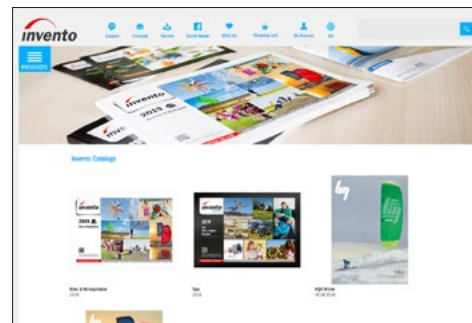

Subscription to Invento Newsletter

After the entry into force of the new EU General Data Protection Regulation, customers and prospects receive our newsletter only if they have explicitly consented to receive the Invento newsletter. So many customers no longer receive our newsletter without knowing it.

You always want to be well informed? You are interested in the Invento newsletter? Then

- contact us directly and share your wish with us or
 - go to the dealer login on www.invento-hq.com and log in. Click on the newsletter link on the appearing account page. This link opens an email that you please send us. You automatically receive a second email from us with the confirmation of your subscription.
- From now on you will receive the Invento newsletter.**

Picture And Video Download

In the service area of our B2B webshop on www.invento-hq.com you will find our download offerings for product and lifestyle images and many videos. Make use of this free service and boost your own sales.

Partner of the NABU

As a partner of NABU, we provide living space for animals on our company property. With this project we want to make an active contribution to protecting diversity and maintaining our natural environment. NABU volunteers manage and maintain this „ark“ in close cooperation with Invento.

ORIGAMI

For more information, visit: www.invento-hq.com

Origami 3D is a real feast for lovers of creative toys and based on the principles of environmental friendliness and ecological thinking. Origami 3D are unique sets that will allow you to create the most beautiful 3D paper sculptures you have ever seen. With patented components and easy-to-understand building instructions, Origami 3D makes it easy for you to create beautiful figurines:

- ▶ Patented paper modules
- ▶ Detailed instruction book is included with each model
- ▶ Step-by-step instructional videos show you how to assemble the selected model
- ▶ The set includes ready-made cut shapes, with a clearly marked bend line, even suggesting the direction in which you should bend it
- ▶ In three simple movements, you can make a basic module that will be used to create a masterpiece
- ▶ All modules are assembled identically and then joined together without any glue to form a sturdy figurine
- ▶ Environmentally friendly creative idea - no plastic, no glue
- ▶ 15 models in 3 different sizes and levels of difficulty - for relaxation, as a gift or an original decoration
- ▶ Made in Europe
- ▶ Age: 8+

GiiKER Super Cube i3S Light

GiiKER Super Cube i3S Light – the smart 3D-Puzzle!

The smart, magnetically mounted, interactive GiiKER Super Cube i3SE (3x3x3 design) combines classic cube design with modern Bluetooth 4.0 technology:

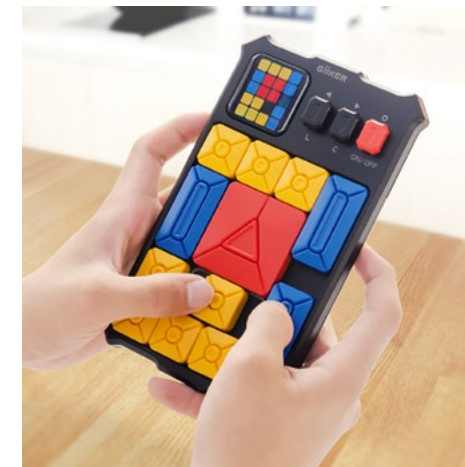

- ▶ Connect to smartphone or tablet via Bluetooth: A 6-axis motion sensor and smart microcontroller transmit ultra-fast moves to the free Super Cube smartphone app (Android 4.4 or higher / iOS 8.0 or higher)
- ▶ Sync technology detects all cube moves in real time, stops and stores the running time, enables solutions in training mode, improves solution speed and provides interesting game variations
- ▶ SUPER CUBE App – learn, train, solve and tournament play:
 - **Learning Mode** – interactive tutorials for beginners
 - **Training Mode** – for experienced cube players, providing a twisted cube and various tools to improve performance
 - **Solving mode** – the app works out a solution to a twisted cube in about 30 moves and provides step-by-step instructions on how to solve it
 - **Tournament mode** – compete in real-time competitions against other cubers from around the world. Includes 1v1, 3v3 and room modes
- ▶ Features various mini-games to challenge speed, memory and reaction skills
- ▶ Material: ABS
- ▶ Size: 56.5 x 56.5 x 56.5 mm
- ▶ With 3.7V lithium battery, charging time: Approx. 1 hour
- ▶ More than 90 hours of fun with one charge
- ▶ Age: 6+
- ▶ Contents: Super Cube i3S Light, attachable „headset“ shaped power connector, micro USB charging cable.

GiiKER Super Slide

GiiKER Super Slide – the interactive sliding puzzle!

Super Slide is a handy interactive sliding puzzle game console, ideal for on the go. With the **LED screen** to set a game, the goal is to move the large square into the automatic detection zone. Super Slide is handy and can be played anytime, anywhere:

- ▶ Exercise your brain in a whole new way with this classic sliding puzzle
- ▶ With time limit challenge that rates your solution time from level E (Fail) to S (Super). Solving hints in learning mode improve your solving time from beginner to master
- ▶ Explore over 500 built-in games with 6 levels of difficulty
- ▶ Interactive game board gives hints when the goal is reached
- ▶ Mechs concept and retro Gameboy design – a great gift idea
- ▶ Magnetic, non-falling-apart design for on-the-go play that can even be held with one hand
- ▶ Supports up to 60 hours of playtime – fun to play while traveling or taking a long break
- ▶ Requires 2 AA batteries (not included)
- ▶ Age: 6+

Learn more about electronics. FRANZIS Electronic Kits are the best way to tap into the exciting world of electronics. The unique FRANZIS Kits provide hours of fun for everyone from beginners to professionals. Each FRANZIS Kit comes complete with all necessary components and detailed assembly instructions:

- ▶ All electronics kits have been developed by experts – refined to maximise functionality and didactics
- ▶ By quickly experiencing success electronics enthusiasts gain greater confidence in their own technical abilities
- ▶ FRANZIS supplies „Quality Time“ for the whole family – time to play, explore and discover
- ▶ Designed to give children and adults an understanding of technology through playful experiments
- ▶ Many FRANZIS kits are unique and often without equal
- ▶ FRANZIS provides endconsumer support with „Lifetime“ guarantee
- ▶ All items come in attractive gift boxes

Metal Detector Kit

Self-assembly kit! The metal detector allows you to go on an exciting treasure hunt for metal object in your neighborhood. The kit contains everything you need to build a fully functional metal detector. The poster guides you through the steps of assembly. Ideally suited for tinkerers interested in technology and for creative minds. Box Contents: Assembled board, battery clip, knob, ring nut, sound converter, manual, jewelry poster. Additionally required: 9 V block battery, adhesive, adhesive tape, 1 empty yogurt cup. Without soldering! Age: 14+

Art. Nr. 504157			
MOQ	CP	MC	4 019631 670533
1	56	56	

Bat Detector Construction Kit

This Bat Detector Kit makes finding bats an easy and fail-safe exercise: The board is already equipped with numerous SMD components. You only have to put together a few parts yourself and wire the board with microphone, loudspeaker and the setting controls. Modern integrated circuits provide high sensitivity and volume. With the finished detector, the ultrasound calls of bats can be made audible. This way you can track down these fascinating flying artists in the dark even where they are otherwise completely unnoticed in the hunt for insects. Requires one 9 V battery (not included). Construction complete without soldering! This is not a toy! Age: 14+

Art. Nr. 504177			
MOQ	CP	MC	4 019631 670137

Air Quality Meter

Whether at home or at work: regular airing is important and keeps you healthy! Build your personal air quality meter! First of all, use the soldering iron: fit the circuit board with the air sensor and all other components. Then simply install it in the housing, calibrate the sensor and the air quality meter is ready to go. In a well-ventilated room, the green light should be on. If the air quality drops, the signal light changes to yellow, indicating that you should ventilate. The highest warning level is indicated by a flashing red light. This helps you avoid „thick air“ and its effects like headaches, fatigue or increased risk of infection. The sensor in this kit reacts to all combustible gases such as hydrogen, methane, solvent vapours and many more. Even a direct breathing on the sensor triggers a reaction. An ideal aid in closed rooms with many people – you always ventilate in good time! You will need: Soldering Iron and Solder. Age: 14+

Franzis FM Radio Construction Kit (no soldering)

Build your own working FM radio without soldering! This great kit contains all the components you need to build your very own piece of retro cool – a modern style working FM radio! Includes full instructions in the shape of a manual. This complete kit (without soldering) contains all of the components you need: housing, loudspeakers, breadboard, receiver board with SMD assembly that includes an integrated TDA7088 VHF receiver, a speaker preamp, potentiometers and lots more. The package introduces and explains several circuit variants. High-quality components ensure clear FM reception and good volume. Reception range: 87.5 MHz to 108 MHz. Dimensions of the assembled radio: W190 x H135 x D25 mm. The perfect gift for „build your own“ fans of all things in a retro look! Additionally required: 1 x 9 V block battery (not included) for up to 50 hours of radio reception. Age: 14+

Volkswagen Bulli T1 Flat-Four Boxer Engine

The Boxer engine conquers the world. When production of the VW Type 2 commenced in 1950, the car was just the second model by Volkswagen after the „Beetle“. With its air-cooled boxer engine, the „Bulli“, as it was called by its fans, became an icon of our roads and its boxer engine became Volkswagen's most-built engine. With this package you can enjoy a transparent functional model of the four-cylinder flat engine (200 parts, scale: 1:4) of the legendary „Bulli“ of the years 1950 to 1953 which fascinates its numerous fans worldwide to this day. Fun technology for you and your whole family! Assemble a detailed transparent engine model of the Bulli in about two hours. All parts of the model kit move exactly like the original does. Including sound module for original motor sound. A richly illustrated companion book with step-by-step assembly instructions leaves no questions about the history of the Bulli and the Boxer engine unanswered. Engine size: 22 x 20 x 17 cm. The components fit together easily, either as interlocking pieces or with screws – no glue required. Additionally required: 3 x 1.5 V batteries (AA). Age: 14+

V8 Engine

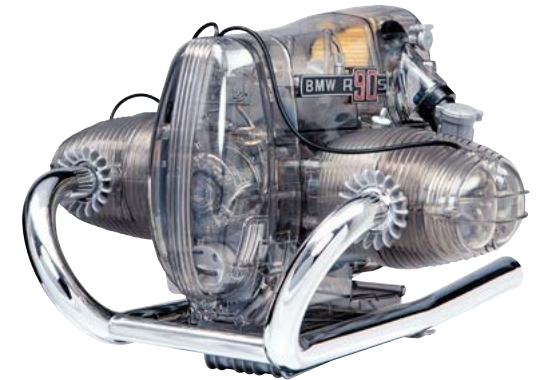

Experience the fascination of the V8 technology! Their power, their sound and the vehicles that they drive are legendary. Examine what lies under the bonnet of many sports cars! Build a fully functional model of an 8-cylinder engine in just four hours and enjoy the fun of experiencing technology. The complete kit contains more than 250 parts and a copiously illustrated manual. The accurate model is transparent so that you can watch how a V8 engine works. The integrated sound module lets you experience the powerful sound of a V8 engine in action. The extensive manual offers a good mix of entertainment and knowledge. It gives a detailed explanation of engine technology by many examples and covers the special features of V8 engines. In addition, the book offers lots of entertainment value, e.g. with reports about the legendary AC Cobra, the use of V8 engines in racing or the most famous cars with V8 engines. The detailed step-by-step instructions show you how to build a V8 engine model with a powerful sound for your workshop or your living room. Get started and bring out your inner engineer! The model kit contains more than 250 parts, an electrical motor and all the tools you need for assembly. The model is easy to assemble – no gluing or soldering required! The transparent casing lets you observe the processes within an 8-cylinder engine: the pistons move up and down, and even the ignition spark is simulated! The sound module lets you experience the original V8 sound in action. Contents: 250-part function kit, V8 sound module, 70-page manual with building instructions. Model size: 28.5 x 20.5 x 20 cm. Additionally required: 3 x 1.5 V-batteries (Type AA). Age: 14+

BMW R 90 S Flat-Twin Engine

Build your own classic, working BMW flat-twin engine modell. The BMW R 90 S was one of the motorcycle icons of the 1970s. When it came on the market in 1973 it was one of the fastest series production motorcycles of its time and the top-of-the-range model of the „/6“ type series made by the Bavarian motorcycle manufacturer. With this 200-part-kit you can enjoy a transparent functional model of the two-cylinder flat engine of the legendary BMW R 90 S which fascinates its numerous fans worldwide. A special highlight of the model kit is its true-to-detail five-speed gearbox. Build your own classic, working BMW flat-twin engine model in about 3 hours: transparent working model, shiftable five-speed gearbox, original motorsound. All parts of the model kit move exactly like the original does. The components are easy to stick and screw together – without any adhesive. The high-quality manual offers lots of both fun and knowledge. Learn about the history of BMW motorcycles and understand the successful concept of the flat-twin engine. Numerous illustrations provide a deep insight into the fascinating world of the BMW „superbike“ R 90 S. Including detailed step-by-step construction manual. Additionally required: 3 x 1.5 V batteries (AA). Age: 14+

Porsche Carrera Racing Engine

Build your own classic Type 547 4-cylinder boxer model! The myth of the Carrera engine! To this day, the model 547 Porsche racing engine is considered to be unique in the world of racing. This technical masterpiece was one of the reasons for the numerous Porsche racing victories in such legendary vehicles as the 356 or the 550 Spyder. With this pack, you can experience the model 547 engine masterpiece and build a transparent working model of the flat-4 horizontally opposed engine. Using the more than 300 parts you can build a detailed transparent engine model, with all parts moving like in the big model: crankshaft, pistons, valves. Including original motor sound. The components are easy to stick and screw together – without any adhesive. Model size: 27,5 x 28,5 x 28 cm. The high-quality companion book offers comprehensive information on Porsche, the early days of racing at the Zuffenhausen sports car makers as well as the Porsche engine 547. Additionally required: 3 x 1.5 V batteries (AA). Age: 14+

Porsche 911 Boxer Engine

The Porsche flat-six boxer engine and the cars it powers are legendary. Build your own classic model (290 parts, model scale: 1:4) of a 1966 Porsche 911 2 litre flat-six engine. Watch its operation through the transparent cylinders to learn how a flat-six engine with its horizontally opposed cylinders works and discover the fascinating world of automotive engineering! All essential engine parts move authentically: Crankshaft, pistons, valves, simulated ignition sparks, ignition distributor, driven fan propeller. Incl. display stand and sound module with the original boxer sound. Improved model: Parts now in new colour, many of them in metallic look, high-quality loudspeaker for powerful boxer sound, extended manual, sound module now with audio output. No glue needed – all components are easy to assemble and screw together. A high-quality companion book provides plenty of information on and fun facts about Porsche and the 911. The development of the iconic design and the corresponding technical concepts are clearly explained. Engine size: 30 x 29 x 22 cm. Contents: 290-part-construction kit, motor sound mule, high-quality companion book including detailed step-by-step instructions. Additionally required: 3 x 1.5 V batteries (AA). Age: 14+

Franzis Ford Mustang V8 Engine

A star is born! Series production of the first generation of the Ford Mustang began in 1964. Since then, the "Pony Car" has become the epitome of the American sports car. What made this legendary automobile with its emblematic running horse on the radiator grille so distinctively charming was its sporty image combined with high-performing, reliable technology under the hood. Build a transparent, functional model of the formidable V8 engine from the 1965 Ford Mustang. The enhanced 289 K-Code V8 High Performance engine produced a captivating 271 HP at 6,000 revolutions per minute, and a maximum torque of 321 lb-ft (423 Newton meters) at 3,400 rpm. The assembly kit uses a scale of around 1:3 and contains approximately 200 individual pieces. In two to three hours, you'll build a finely detailed, transparent Ford Mustang 289 K-Code V8 model engine with original motor sound. All of the model parts move exactly as they do on the original, life-size model. The components fit together easily, either as interlocking pieces or with screws – no glue required. The Ford Mustang kit comes with an exclusive 100-page booklet, complete with top-notch details and numerous stunning illustrations that guide you through the history of the Ford Mustang while outlining the technology that lies under the hood. The handbook contains a detailed and generously illustrated step-by-step guide that will lead you through the construction of the engine kit with clear instructions. Additionally required: 3 x 1.5 V batteries (AA). Age: 14+

RC Mini Racer 2.4 GHz

One of the smallest remote control speed racers in the world. Speedy like a weasel, this little pocket racer thrills young and old alike with its sportiness and offers clever features and outstanding value for money. 4 pylons included for your challenge. Headlights and tail light will be turned on when driving forward and backward. Recharge the car through the controller. Charging cable is well integrated inside the controller - easy and convenient! Long running times and short recharging periods for unlimited driving fun. Various models and colours randomly available.

- ▶ RC Mini Racer with adjustable directional stability, assorted colors
- ▶ Scale 1:63
- ▶ 2.4 GHz
- ▶ LED illumination while driving: 2 headlights, 1 rear light
- ▶ 2-channel remote controller with integrated charging cable & indicator
- ▶ 4 pylons
- ▶ Super-cool can packaging - perfect as a gift
- ▶ Multilingual manual included
- ▶ Operating time: approx. 5 minutes, Charging time: approx. 4 minutes
- ▶ Age: 8+

Recommended accessories: 2 x AA 1.5 V batteries (not included).

MOQ 12	CP 12	MC 48	4 031169 196309

RC Mini Fire Truck

The RC Fire Truck promises pure action despite its small size! The ladder can be extended to a length of 13 centimetres. With its 2-channel remote control this vehicle moves fast and agile. A super-cool fire extinguisher packaging makes the RC Fire Truck a great gift idea for many occasions:

- ▶ Fire Truck size L 8 x W 3 x H 4 cm (length of extended ladder: 13 cm)
- ▶ LED illumination (2 front LEDs) while driving
- ▶ 4 pylons
- ▶ 2-channel remote controller (right, left, forward, backward) with well-integrated charging cable and charging indicator
- ▶ Frequency: 27 MHz
- ▶ Attractive fire extinguisher packaging
- ▶ Multilingual manual
- ▶ Operating time: approx. 7 minutes
- ▶ Charging time: approx. 5 minutes
- ▶ Range of remote control: approx. 6-9 m
- ▶ Age: 8+

Recommended accessories: RC Fire Truck, 4 pylons, remote controller with charging cable, instruction manual.

Recommended accessories for the remote controller: 2 x AA 1.5 V batteries (not included).

WOODEN CITY

Wood Trick[®]
A NEW WORLD OF ART

For more information, visit: www.invento-hq.com

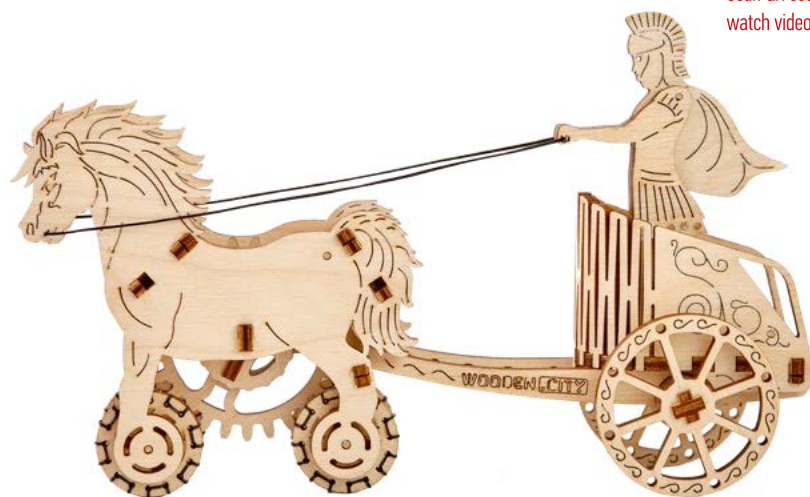

Wooden City + Wood Trick – the unique wooden mechanical models:

- ▶ Natural materials – all 3D model kits made from sustainably sourced birch plywood
- ▶ Assembly of sets does not require any glue or tools
- ▶ Mechanical functions – all models produce motion (self-propulsion or other functions)
- ▶ Moving parts are sturdily constructed (e.g. stable and solid axes) and different from competitors
- ▶ Unique 3D wooden models provide a variety of functions and work without any electronic components
- ▶ Easy assembly – ready-to-assemble parts are laser-cut
- ▶ Attractive packagings (e.g. wooden boxes with Wooden City items)
- ▶ Made in Europe
- ▶ Unique designs make all 3D wooden models popular collection models
- ▶ All functional models are not children's toys
- ▶ Age: 14+

Roman Chariot

This WOODEN CITY 3D model kit is a copy of a war chariot employed and operated by Roman warriors in ancient times. Assemble this historically accurate model with ready-to-assemble laser-cut parts and the rubber band engine which is included in the box. Wind up the rubber motor with the wooden key and start the chariot with the trigger lever. The operating time is 1 minute. Incl. detailed step-by-step instructions. The explanations of assembly stages are intuitive and easy to follow. The Roman Chariot is a perfect model for beginners. Age: 14+

Wooden mechanical 3D model: self-assembly requires no glue or tools

Number of parts: 69

Assembly time: approx. 2 hours

Model size: H13 x W22 x D5.5 cm

Packaging size: H17.5 x W24 x D2.8 cm

Art. Nr. 502322

MOQ	CP	MC	5

Chariot Da Vinci

Da Vinci scythed chariot is an ancient war chariot with scythe blades mounted on each side. The blades extended horizontally to each side of the wheels. Theoretically the scythed chariot would plow through infantry lines cutting combatants in half or at least opening gaps in the line which could be exploited. This historically accurate WOODEN CITY 3D model kit with a rubber band engine was created to show you the amazing world of ancient mechanics. Assemble this historically accurate model with ready-to-assemble laser-cut parts and the rubber band engine which is included in the box. Wind up the rubber motor with the wooden key and start the chariot with the trigger lever. The operating time is 1 minute. Incl. detailed step-by-step instructions. The explanations of assembly stages are intuitive and easy to follow. The Da Vinci Chariot is a perfect model for beginners. Age: 14+

Wooden mechanical 3D model: self-assembly requires no glue or tools

Number of parts: 74

Assembly time: approx. 2 hours

Model size: H10.7 x W23 x D10.4 cm

Packaging size: H17.5 x W24 x D2.8 cm

Kinetic Picture

What at first glance looks like a clock is in reality the model of a Kinetic Picture. Assemble this unusual moving picture with ready-to-assemble laser-cut parts and the rubber band engine which is included in the box. Wind up the rubber motor with the wooden key and start the Kinetic Picture with the trigger lever - the optical illusion will capture your imagination. Observe the whole rotation process when the Kinetic Picture triggers off the gears. Adjust the tightness of the rubber band and speed of rotation of the mechanism with the trigger lever. A hook is attached to hang the picture on a wall. The operating time is 1 minute. Incl. detailed step-by-step instructions. The explanations of assembly stages are intuitive and easy to follow. The Kinetic Picture is a real fun for those who appreciate beauty and love science. Age: 14+

Wooden mechanical 3D model: self-assembly requires no glue or tools
 Number of parts: 185
 Assembly time: approx. 6 hours
 Model size: H22.4 x W34.4 x D6.2 cm
 Packaging size: H24 x W35.5 x D4 cm

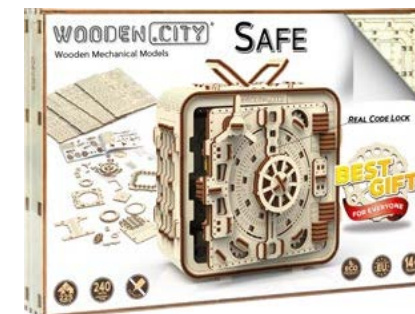

Art. Nr. 502332			
MOQ 1	CP 9	MC 9	5 906874 128077

Safe

This model of Wooden City is a real safe with combination lock - it can be opened with a secret number combination of 3 digits. The code can be changed at any time. If the code has been forgotten, the safe can be opened with a secret function (this method is described in the manual). If the combination was correct, the safe opens automatically when the third digit is entered. To lock the safe again, just close the door and turn the knob - the safe locks itself. The safe is the perfect model for hiding banknotes or other valuables. With handle for easy transport. Age: 14+

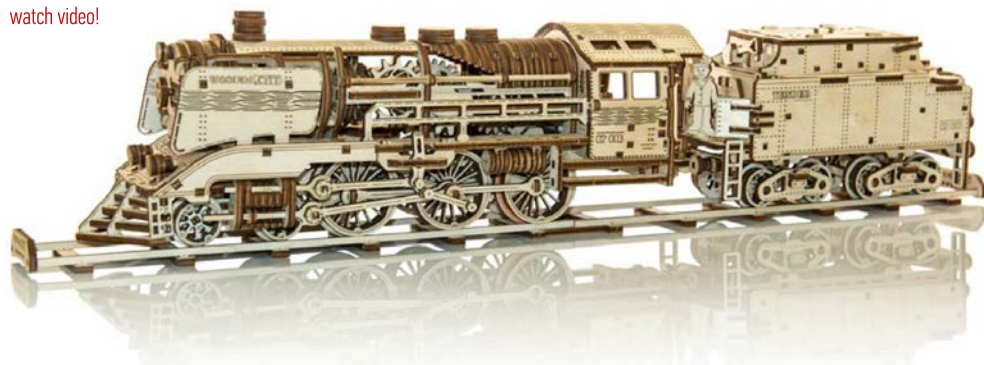

Wooden mechanical 3D model: self-assembly requires no glue or tools
 Number of parts: 202
 Assembly time: approx. 4 hours
 Model size: H15 x W15 x D15 cm

Express Train + Tender + Rails

The Wooden City Locomotive with a Tender is a mechanical masterpiece reminiscent of the steam wheels of bygone times. The tender has a coupling for attachment and detachment. The locomotive is powered by a rubber motor and gears, but all other functions (e.g., pistons, valves, cylinders, connecting rods, drive rods) are very close to those of a real steam locomotive. A detailed cabin, the boiler cladding and functioning doors and flaps make the steam locomotive a fascinating model in the Wooden City range. Age: 14+

Wooden mechanical 3D model: self-assembly requires no glue or tools

Number of parts: 558

Assembly time: approx. 12 hours

Model size: H12.2 x W55.8 x D11 cm

Packaging size: H24 x W35.5 x D4 cm

Jeep 4x4

Today the "Jeep" is a synonym for an expensive off-road vehicle. During WWII, the American company Willys started production of the Willys MB automobile. It went down in history as a reliable, manoeuvrable and functional vehicle. It was a "technical breakthrough". There was a real "war of engines". Overcoming of obstacles, road dust and risk - you have a real adventure in your hands! Assemble this exciting model with ready-to-assemble laser-cut parts and the rubber band engine which is included in the box. Wind up the rubber motor with the wooden key and start the Jeep. After assembly, you need to set the position of the lever forward or backward, set the locking lever in the stop position, start the model with the key and lower the lever (the key is located in the spare wheel). The front wheels are steered. Open and fix the hood by two locks and tilt the windshield. The Jeep can boast further exciting features - four-wheel drive transmission, independent suspension on both axles, internal combustion engine with moving pistons, 3 moving pedals (which are resiliently pressed with an additional rubber band), rear-view mirror, removable shovel, axe and canister. The Jeep runs up to 4 meters and is a real find for those who are fond of history and adventure. Incl. detailed step-by-step instructions. The explanations of assembly stages are intuitive and easy to follow. The Jeep will serve you for many years as an original interior decoration and a proof of your engineering skills. Age: 14+

Wooden mechanical 3D model: self-assembly requires no glue or tools

Number of parts: 564

Assembly time: approx. 12 hours

Model size: H15.1 x W27.9 x D14.8 cm

Packaging size: H24 x W35.5 x D5.1 cm

Trailer

Now complete your Wooden City Jeep 4x4 with the detailed military trailer. The trailer is provided with a suspended axle. A special lever makes it possible to tilt the loading area, the rear loading flap can also be opened. A removable reserve canister as an accessory gives the trailer that last little touch. The trailer has a clutch and can be easily connected to the Jeep 4x4. Age: 14+

Wooden mechanical 3D model: self-assembly requires no glue or tools

London Bus

Have you ever been to London before? Are you a 3D puzzle geek like us? Plunge into the vibrant London atmosphere by building our new WOODEN CITY 3D mechanical model – the famous London double-decker! Assemble this exciting model with ready-to-assemble laser-cut parts and the rubber band engine which is included in the box. Wind up the rubber motor with the wooden key and start the London Bus. There are two trigger levers installed in this London Bus model to operate the speed level (speed control trigger) and the bus driving direction (direction control trigger). Listen to the engine sounds that we meticulously crafted in the manufacturing process to provide a more realistic driving experience. The London Bus rubber band engine operates in 2 speeds and is the most powerful on the market – the London Bus runs up to 4 meters. But that's not all! The London Bus has three passengers whose safety will be in your hands. Incl. detailed step-by-step instructions. The explanations of assembly stages are intuitive and easy to follow. The London Bus will serve you for many years as an original interior decoration and a proof of your engineering skills. Age: 14+

Wooden mechanical 3D model: self-assembly requires no glue or tools

Number of parts: 216

Cafe Racer (Motorcycle)

British motorcycle fans of the early 1960s often held original events in pubs and cafes with races to music in London. The distance from the Ace Cafe to the next roundabout was 2 km, and the racers had to cover this distance while the song was played in the jukebox. The detailed Cafe Racer model by Wooden City pays homage to the motorcycles of that time. Age: 14+

Wooden mechanical 3D model: self-assembly requires no glue or tools

Number of parts: 85

Assembly time: approx. 2 hours

Model size: H6.5 x W13.6 x D6 cm

Biplane

Would you like to build your own airplane in less than 2 hours? Do you enjoy 3D wooden model kits as much as we do? Then go ahead with the WOODEN CITY Biplane model. Assemble this exciting model with ready-to-assemble laser-cut parts and the rubber band engine which is included in the box. Wind up the rubber motor with adjustable acceleration and start the Biplane - the Biplane runs up to 0.5 meters. Incl. detailed step-by-step instructions. The explanations of assembly stages are intuitive and easy to follow. The Biplane is an amazing gift for anyone with a passion for airplanes with geared engines. It will serve you for many years as an original interior decoration and a proof of your engineering skills. Age: 14+

Wooden mechanical 3D model:

self-assembly requires no glue or tools

Number of parts: 63

Ferris Wheel

This WOODEN CITY 3D model kit of a Ferris Wheel is an original interpretation of the well-known amusement park attraction and a tribute to the engineers who realised our dreams to see the world from a bird's eye view. The Ferris Wheel model can boast nice bonus features – a secret casket and a small coin box. Assemble this exciting model with ready-to-assemble laser-cut parts and the rubber band engine which is included in the box. Wind up the rubber motor with the wooden key and start the Ferris Wheel with the trigger lever. The operating time is 2 minutes. Incl. detailed step-by-step instructions. The explanations of assembly stages are intuitive and easy to follow. The Ferris Wheel is a project of advanced level of difficulty. It will serve you for many years as an original interior decoration and a proof of your engineering skills. Age: 14+

Wooden mechanical 3D model: self-assembly requires no glue or tools

Windmill

Green meadows, birds in the blue sky, and a windmill – windmills have shaped European landscapes for centuries. As soon as you open the wooden box this mechanical model will take your imagination. The Windmill model can boast a nice bonus feature – a small coin box at the bottom of the patterned stand. Assemble this exciting model with ready-to-assemble laser-cut parts and the rubber band engine which is included in the box. Wind up the rubber motor with the wooden key and start the Windmill with the trigger lever. Observe the whole rotation process when the Windmill triggers off the gears, among which there is a flywheel, and a real planet gear. On the left there is a trigger lever to stop movement of the Windmill. The operating time is 1 minute. Incl. detailed step-by-step instructions. The explanations of assembly stages are intuitive and easy to follow. The Windmill is a project of advanced level of difficulty. It will serve you for many years as an original interior decoration and a proof of your engineering skills. Age: 14+

Galaxy Marble Run

Dive into the world of technology with this fascinating marble run from Wood Trick. The set consists of steep tracks with sharp turns, steps, swings and descents, as well as a rotating planet. Continuous operation is ensured by an elevator, which is driven by an electric motor - the launched metal ball passes all obstacles and rises again to the top. The marble run is equipped with 12 metal balls that move one after the other, rise and spread on different tracks, creating fascinating effects. The shaft drive ensures smooth operation without jerking. The motor requires 4 AA batteries 1.5V, which are not included. Age: 14+

Wooden mechanical 3D model: self-assembly requires no glue or tools

Time for Machine: Silver Bullet

The Silver Bullet impresses with its legendary, elegant retro design. A fast sports car from the past, inspired by the winners of international car races at the beginning of the 20th century. The Silver Bullet is powered by a spring drive. At the bottom of the body you can see the open tie rods that go to the front wheels. The complex engine gears can be seen under the hood. The kit also contains detailed operating instructions that explain the assembly of the parts in an understandable manner. Age: 14+

- ▶ Metal mechanical 3D model: Made of high-gloss, stainless steel (AISI 304)
- ▶ Contents: 3 metal plates with parts, 4 additional gears, spring drive, pliers, file, gloves, cloth for polishing, instruction manual
- ▶ Number of parts: 97
- ▶ Model size: H57 x W151 x D44 mm
- ▶ Packaging size: H125 x W255 x D23 mm

Art. Nr. 502000

Time For Machine: Luxury Roadster

The Luxury Roadster is reminiscent of the legendary Bentley Speed Six which became famous through a series of record-breaking competitions between automobiles and trains in the late 1920s and early 1930s. The model provides impressive features: Rubberized metal wheels for better traction, equipment details made of soft eco leather underline the historical character of the model, pre-assembled spring drive for easy assembly, autopilot steering function, forward/reverse switch. Doors, hoods and the small luggage compartment can be opened. The kit also contains detailed operating instructions that explain the assembly of the parts in an understandable manner. Age: 14+

- ▶ Metal mechanical 3D model: Made of high-gloss, stainless steel (AISI 304)
- ▶ Contents: 4 metal plates with parts, 3 additional gears, soft eco-leather, 4 rubber treads for the wheels, pre-assembled spring drive, pliers, file, gloves, cloth for polishing, instruction manual
- ▶ Number of parts: 146
- ▶ Model size: H84 x W210 x D65 mm
- ▶ Packaging size: H175 x W357 x D35 mm

Marvel Tank

With its shape, the Marvel Tank is reminiscent of the Mark 1, the first operational tank ever. The mechanical tank tracks can be set in motion or stopped by winding a mechanical spring and an ON / OFF switch. The speed of the tank can be regulated by a special lever. The kit also contains detailed operating instructions that explain the assembly of the parts in an understandable manner. Age: 14+

- ▶ Metal mechanical 3D model: Made of high-gloss, stainless steel (AISI 304)
- ▶ Contents: 4 metal plates with parts, 9 additional gears, spring drive, pliers, file, gloves, cloth for polishing, instruction manual
- ▶ Number of parts: 140
- ▶ Model size: H63 x W141 x D48 mm
- ▶ Packaging size: H125 x W255 x D23 mm

Art. Nr. 502002			
MOQ 1	CP 5	MC 30	

Hot Tractor

This sturdy metal model is based on the industrial design of the real heavy K700 tractor. The Hot Tractor is the perfect entry into the world of Time for Machine modelling – easy to assemble without a spring drive. The Hot Tractor's wheels are movable and its rear axle can be swiveled, the cabin doors and bonnet can be opened. The kit also contains detailed operating instructions that explain the assembly of the parts in an understandable manner. Age: 14+

- ▶ Metal mechanical 3D model: Made of high-gloss, stainless steel (AISI 304)
- ▶ Contents: 3 metal plates with parts, instruction manual
- ▶ Number of parts: 90
- ▶ Model size: H55 x W112 x D44 mm
- ▶ Packaging size: H170 x W170 x D7 mm

Dazzling Steamliner

The Dazzling Steamliner is a model from the universe of steampunk and dieselpunk, which resembles historical steamliners covered in a sleek aerodynamic body. The Dazzling Steamliner looks futuristic and fascinating and is the top model in the Time for Machine range. A spring drive sets the model in motion with many moving parts. Observe the movements of gearwheels and flywheels inside the train. The layout of the wheels is reminiscent of the famous Union Pacific Big Boy. The wheelbase of the locomotive is 4-12-6. Model scale: 1:64. Rail width: 24 mm. The coal tender can be unhooked from the locomotive. The kit also contains detailed operating instructions that explain the assembly of the parts in an understandable manner. Age: 14+

- ▶ Metal mechanical 3D model: Made of high-gloss, stainless steel (AISI 304)
- ▶ Contents: 7 metal plates with parts, 38 additional gears, spring drive, pliers, file, gloves, cloth for polishing, instruction manual
- ▶ Number of parts: 256
- ▶ Model size: H71 x W510 x D62 mm, rails 1530 x 37 mm
- ▶ Packaging size: H175 x W345 x D45 mm

Starbreeze Explorer

Starbreeze Explorer is reminiscent of Space Shuttle program in which shuttles have made more than a hundred trips with many breakthroughs in the exploration of space. The model consists of several parts (Space Shuttle, accelerator unit, stand), which impress by their fascinating details and can be connected to each other: Swinging cargo hold flaps, a spring drive which allows the shuttle to make several spins around its axis, the stand is designed according to the coastline of Cape Canaveral. The model can also be placed vertically on the stand. The kit also contains detailed operating instructions that explain the assembly of the parts in an understandable manner. Age: 14+

- ▶ Metal mechanical 3D model: Made of high-gloss, stainless steel (AISI 304)
- ▶ Contents: 3 metal plates with parts, 11 additional gears, pre-assembled spring drive, pliers, file, gloves, cloth for polishing, instruction manual
- ▶ Number of parts: 155
- ▶ Model size: H212 x W253 x D118 mm
- ▶ Packaging size: H178 x W357 x D35 mm

Chrome Rider

The Chrome Rider is the perfect model for real motorcycle fans and impresses with its engineering out of the ordinary. The Chrome Rider is not driven by a spring, but by a massive flywheel in the center of the vehicle. Driven by this flywheel the Chrome Rider can easily cover a distance of up to 10 meters while reliably maintaining its balance, additionally supported by the movable steering fork. The wheels are mounted on bearings for a particularly smooth run and the treads are made of rubber for better traction. The kit also contains detailed operating instructions that explain the assembly of the parts in an understandable manner. Age: 14+

- ▶ Metal mechanical 3D model: Made of high-gloss, stainless steel (AISI 304)
- ▶ Contents: 3 metal plates with parts, 6 additional gears, 4 bearings, 4 rubber treads for the wheels, pliers, file, gloves, cloth for polishing, instruction manual
- ▶ Number of parts: 90
- ▶ Model size: H67 x W150 x D60 mm
- ▶ Packaging size: H141 x W327 x D27 mm

Tiny Sportscar

Their elegance and a striking design make the Grand Prix racing and sports cars of the 1930s classics of motorsport. The view on the gearwheel mechanism and steering gives the model a special fascination and makes it a timeless collectible and decorative object for living rooms or the office, not only for racing enthusiasts and classic car fans. The gearwheel mechanism sets the model in motion. Age: 14+

- ▶ Metal mechanical 3D model: Made of high-gloss, stainless steel (AISI 304)
- ▶ Contents: 1 metal plate with parts, 6 additional gears, instruction manual
- ▶ Number of parts: 64
- ▶ Model size: H28 x W94 x D42 mm

► Airglider

With wings made of extra strong rip-stop fabric and a fiberglass and carbon composite frame, our gliders are robust and more durable than conventional models. With their graceful lines and delicate aerobatic manoeuvres these gliders offer a feast for the eyes while they soar through the sky. Our Airglider offers the flyer many alternatives to experiment with the flight experience. You are encouraged to add or subtract ballast and adjust the wings to alter the flight characteristics.

Airglider 40

Start with: Handstart, rubber band catapult (incl.).
Wingspan: 40 cm, **Length:** 45 cm, **Sail:** Ripstop-Polyester,
Fuselage: Carbon, **Age:** 6+

„Red / Yellow“

Counter display „Zzzopa Sport“ (12 pcs, assorted)

Spin it! Bounce it! Throw it! Introducing the Wicked Zzzopa – the world's first bouncing ball with high speed spin technology! Each Zzzopa contains a high-quality bearing that sits on an axle within the centre of the ball. This means you can spin your Zzzopa in your fingertips with speed, precision and ultimate satisfaction! This is not just a spherical fidget spinner...the Zzzopa's outer poly-active surface allows for incredible bounce, creating a play pattern unique from any other ball on the market. De-stress by spinning...test your strength by bouncing...or combine both to bamboozle your friends with crazy, spinning jumps and ricochets! The Zzzopa's got it all. We've included a clever 'spin me' feature in each box, allowing the customer to check out the Zzzopa's effortlessly smooth spin even when it's still in store. Different ball designs. Ball diameter: 6 cm. 12 pcs counter display (W41.8 x D26 x H15 cm). Contents: 4 pcs each of Goal, Ace, Slam Dunk.
